

Immigration: Bull Points On Labour's Record

1. Immigration increased **five fold** under Labour
2. Net foreign immigration was **3.6 million** – 3½ times the population of the city of Birmingham.
3. Labour have apologised for East European immigration but non-EU migrants were 2/3rd of the total.
4. This was not a result of "Globalisation". It was an entirely deliberate policy but Labour never admitted it in three manifestos.
5. It has not been possible in 5 years to turn around the chaos of 13 years.
6. We now face a massive population increase. In the next Parliament this will amount to the equivalent of building **Birmingham every 2 years.**
7. **At least two thirds** of that increase will be due to immigration.
